

At Judaberg (center) we have a high school for fish and food, - Rygjabø high school. Rygjabø is the only school for fish education in Rogaland County. Pupils learn and get theoretical and practical knowledge for fish and food industry. In cooperation with the project Vital Rural Area and Finnøy Næringshage/ municipality, Rygjabø are planning to establish a regional knowledge center for local and small industry food producers (green and blue- food).
