

In 2010 we continued the cooperation with Artevelde University College in Ghent, department of Teacher Training. Just like last academic year, students developed educational material focused on the Meetjesland for pupils in primary schools. We organized several meetings with the students and their teachers to guide them and follow the process and results of their projects. Their material was tested during a try-out in a primary school in the Meetjesland. In 2011 we would like to promote and disseminate the material to the directors and relevant teachers of the about eighty primary schools in our region by means of an interactive website. For the realization of the website we made a project-application to the LEADER-agency of our region.
