

In 2009 we developed a calendar with pictures that translate the goals of our future plan 2020. The pictures were made by a professional photographer. For each picture several contacts had to be made (participants, enterprises, non-profit organizations,). Also the concept was well thought-out during several meetings. With the pictures developed for the calendar, we also organized an exhibition. Inhabitants could see the exhibition in the local hospital AZ Alma, in several libraries, rest-homes, town halls and cultural centers. The exhibition was a huge success. Spectators were surprised about the qualities of their region and appreciated the beauty of the pictures. Making inhabitants more conscious about the qualities of our region (beautiful landscapes, economic power, well organized mobility, ...) was one of the main purposes of this exhibition.
